EDUCATION

• Bachelor of Technology in Computer Engineering

CGPA: 8.8/10

2022-2026

Delhi Technological University

WORK EXPERIENCE

• Paytm

Jul 2026 – Present

Software Engineer – Backend

Noida, India

- Owned the **Maker-Checker approval microservice** for merchant onboarding, implementing configurable multi-level approval workflows and plugin-based validation logic.
- Migrated static configuration from **database tables to YAML-based configuration**, removing redundant DB dependencies and enabling **AI agents to directly manage configuration through the repository**, with functional accuracy validated across onboarding workflows.
- Dockerized the Maker-Checker microservice** with mocked upstream and downstream dependencies, enabling the complete service stack to run locally with isolated external dependencies.
- Improved **unit and integration test coverage from 32% to 91%**, strengthening reliability and reducing regression risk across production services.
- Designed and configured **end-to-end merchant onboarding workflows** across development, testing, UAT, and production environments for diverse onboarding use cases.
- Investigated and resolved **production issues across distributed microservices** by tracing requests, analyzing logs, validating database state, and implementing backend fixes.

• Paytm

Jan 2026 – Jul 2026

Software Engineer Intern – Backend

Noida, India

- Developed **Java and Spring Boot** backend services for Paytm's merchant onboarding platform, implementing business validations and REST APIs across onboarding workflows.
- Contributed to the **Payment Link (P4B)** onboarding feature and migration of onboarding services from a monolithic application to microservices.
- Debugged and resolved backend issues by analyzing **application logs, database state, and distributed service interactions**, contributing to reliable production releases.

• Tech Mahindra

May 2025 – Jul 2025

Software Development Intern (SDE Intern)

Pune, Maharashtra

- Supported the **Verizon Visible** project by troubleshooting CRM-driven telecom workflows and production incidents in SLA-bound systems using **Postman** and **Splunk**.
- Worked with **Salesforce security models** including OWD, Role Hierarchy, Sharing Rules, Profiles, and Permission Sets; gained exposure to Matrixx, SAP, MTAS, and Apigee integrations.

PROJECTS

• Splitzy - AI-Powered Expense Sharing Platform

GitHub | Live

- Built a scalable full-stack expense management platform using **Next.js 15**, **React 19**, and **Convex real-time database**.
- Designed dynamic group expense-splitting algorithms supporting equal, percentage-based, and custom splits.
- Integrated **Google Gemini AI** for intelligent expense categorization and spending pattern insights.
- Implemented secure authentication with **Clerk** and real-time balance reconciliation across users.
- Developed asynchronous workflows and automated email reminders using **Inngest**.

TECHNICAL SKILLS

- Languages:** Java, C/C++, Python, JavaScript, SQL
- Backend:** Spring Boot, Microservices, REST APIs, Node.js, Express.js
- Frontend:** React.js, Next.js, HTML, CSS
- Databases:** MongoDB, MySQL
- Developer Tools:** Git, GitHub, Bitbucket, Jenkins, Postman, Jira, Confluence, AWS
- Core Concepts:** Data Structures, Algorithms, OOP, Operating Systems, DBMS

ACHIEVEMENTS & EXTRACURRICULARS

- Competitive Programming:** Solved **1200+** problems; **Knight** on **LeetCode** (Max: **1957**), **3 star** on **CodeChef** (Max: **1725**), **Specialist** on **Codeforces** (Max: **1530**)
- Coding Profiles:** LeetCode | CodeChef | Codeforces | CodeStudio | GeeksForGeeks
- Top Contest Ranks:** Global Rank **209/27939** (LeetCode Biweekly 169); **1160/30034** (Codeforces Round 988 Div 3)
- AWS Certification:** Completed **Architecting on AWS** (Mar'26) – VPC, EC2, Load Balancing, Auto Scaling, ECS/EKS
- NPTEL Certifications:** **94%** in “Joy of Computing Using Python”; **96%** in “Internet of Things”
- Responsibility:** Mentored school students under the **Desh Ke Mentor** program
